

- ▶ Supports credit, debit, EBT and check services
- ▶ Multi-application and multi-merchant processing
- ▶ Multiple communication options – Dial, IP and Wireless

Restaurant – Verix® V^x

FULL SUPPORT FOR VERIFONE® MULTI-APPLICATION SOFTWARE

Restaurant – Verix V^x is the next generation of the Verix product line offering contactless acceptance, and Wireless or IP connectivity via Global Payments' secure proprietary SSL gateway for both card and check processing. Customers can now take advantage of the speed, security, mobility and potential cost savings that contactless acceptance and Wireless or Internet processing provides for both forms of payment. Targeting fine dining, family restaurants, bars and taverns, Restaurant – Verix V^x provides support for multiple applications – card, check and gift acceptance in a single terminal – making it a standout in restaurant point-of-sale processing.

General Product Features

- Supports Fast Payment Service (FPS) environments
- Supports waiter banking and central cashier processing
- Offers tab management for bars and taverns
- ACH Check option
- Optional check guarantee and verification
- Large transaction capacity (500+ per terminal)

FEATURES

- ▶ Card-Not-Present (CNP) processing
- ▶ Offers server entry and reporting
- ▶ Tip edit check
- ▶ Tip reporting
- ▶ Multi-service guarantee and verification – up to three check services per merchant
- ▶ Optional American Express® Reverse PIP processing
- ▶ Customer Discretionary Data (CDD) option

BENEFITS

- ▶ Satisfies merchant Card-Not-Present needs with mail/telephone/Internet order transaction processing
- ▶ Enables managers to easily track employee productivity
- ▶ Prevents settlement when un-tipped items are present in the batch
- ▶ Provides reporting by server ID; includes sale and tip amounts
- ▶ Customizable to meet individual needs – up to three services per merchant (Face-to-Face, COD, Mail Order)
- ▶ Authorization and settlement directly with American Express lowers merchant's processing costs
- ▶ Ability to enable a user-defined field (up to 20 characters) to meet business needs
